01 INTRODUCTION

ALTRON is a fast-growing cryptocurrency that was launched in August 2021.

This innovative token's main purpose is to build a strong community with dedicated holders who earn rewards while holding.

By utilizing the Binance Smart Chain, buying or selling ALTRON is not only fast but also cheap in terms of transactions fees.

Our team consists of a few you people with different backgrounds and skills who are striving every day to make ALTRON better. We are consistently expanding our team and partners by interacting with our community to find the best people to bring our project forward.

The developer team burned all of their tokens and participated with everyone else equally.

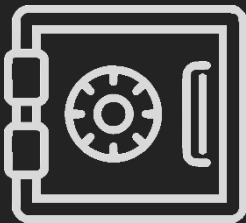

ALTRON is affordable for everyone and has committed itself to be fair and transparent to its community.

02 OUR MISSION

COMMUNITY

We are all about building a strong community by being transparent and integrating the community in our decisions.

HOLDERS

They are the backbone of the token and as such they are rewarded with passive income for holding ALTRON.

ORGANIC GROWTH

Our tokenomics ensure organic growth by burning tokens, reflections to our holders and providing liquidity with each transaction.

03 HOW TO BUY

ALTRON is available on PancakeSwap which is a decentralized exchange (DEX) running on BEP20. It's a guarantee that your funds will not be locked under any circumstances when you are trading on this platform. It means that you will not face the problems that centralized exchanges are known for.

- 1 Download the MetaMask or Trust Wallet Application.
- 2 Purchase Binance Tokens (\$BNB) and send them to your MetaMask or Trust Wallet.
- 3 On the home page of ALTRON, click on the "Buy Now" button. This will open PancakeSwap.
- 4 On PancakeSwap, select \$ALT by clicking on "Manage Tokens", then insert the ALTRON contract address in the text box and click "Import".
- 5 Make sure your wallet is synced with PancakeSwap.
- 6 Set the amount of \$ALT you would like to purchase, then press Swap.

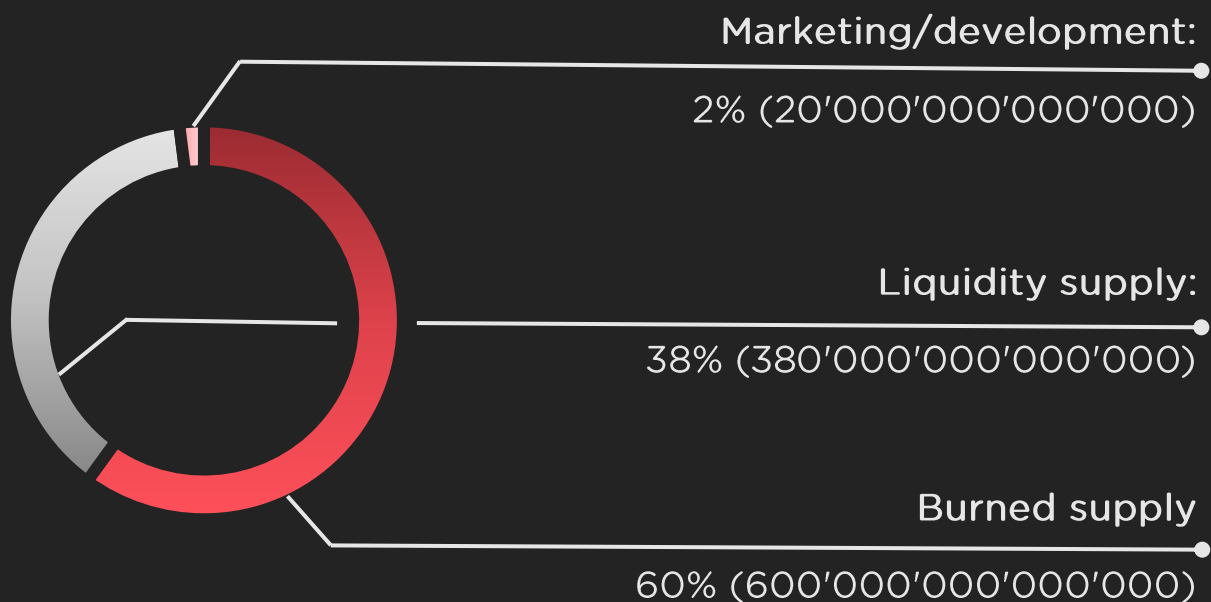

Congratulations, you now have successfully bought ALTRON!

ALTRON FEE

Each ALTRON transaction is taxed 11% and distributed like:

- **Reflection**
The reflection fee rewards holders directly through a pro-rata distribution based on the tokens held out of the total supply.
- **Burn**
The burn fee serves the purpose of creating deflationary pressure on the token supply. This fee is automatically burned and removed from the circulating supply.
- **Marketing**
The marketing (and business development) fee is crucial to ensure the longevity of the project. It is used to fund strategic marketing campaigns and to further develop the token with the goal of reaching a strong market position.
- **Liquidity**
The liquidity fee works as an inhibitor of liquidity depletion caused by panic selling, whales control, or price manipulation. The fee is automatically distributed to multiple pools used by exchanges.
